

I believe we were discriminated into having a variety of choices with the provision of VRS. We should have equal access to a variety of choices, one from another, not limited to just one provider, but all providers should allow us to have this access with just one equipment. Please enforce this law upon business that limited us into one vrs provider. If this is not enforced, I am forced to close this limnited VRS provider and join other unlimited provider, thank you very much.
